1. Travellers between Bucharest and Constanta and persons visiting the lower Danube in the Tulcea area have commented on the large number of excavations and earthworks which appear to be intended as emplacements for anti-aircraft artillery.
2. Party "responsibles" in Bucharest have informed factory workers that factory whistles and other devices to signal the beginning and end of the work day will be replaced by air raid sirens. The "responsibles" have told the workers that they should not be frightened by this change since it was made solely in the interest of the workers themselves.
